

Mica Kerridge

Whispers of Time

Whispers of Time is a series of encaustic style paintings that delve into the fragmented and often overlooked remnants of urban landscapes. A ruin is not always what it appears to be; we can pause to appreciate the layers of character it reveals, stories of beautiful colours and memories embedded within.

Mica seeks balance between the spontaneity of gesture and careful deliberation, believing that it is essential to allow something to emerge naturally.

Through this series, Mica explores her fascination with the elusive nature of perception and memory.
